SEATING

Tab

The Tab Chair series is a humanistic response to the various ways we sit in a chair, created with elegance, creativity and discipline by Alain Berteau. The back has a flex which makes comfortable and ergonomic seating. The front of the chair is padded and upholstered; the back is a hard shell in lacquer or natural wood finish. The base is available in cantilever, sledge and height-adjustable 5-star with castors. The sledge base chair is stackable and available with interlocking connectors.

Alain Berteau ontwierp de Tab Chair, een polyvalente stoel die omwille van zijn specifieke vormgeving verschillende zithoudingen toelaat. Op deze manier beantwoordt hij op een ergonomisch verantwoorde manier aan de behoefte van de zittende mens om vrij te bewegen. De voorzijde van de stoel is bekleed; de rug is in finer of gelakt. Tab Chair is verkrijgbaar op sledeonderstel, op open slede, met vijfsteronderstel op wieltjes of als barkruk. De stoel met sledeonderstel is schakelbaar en stapelbaar tot 6 stuks.

Alain Berteau a créé la chaise Tab, une chaise polyvalente destinée aux marchés résidentiels et commerciaux. Son dossier plié en accoudoir favorise les postures relâchées et la rend très maniable. La chaise Tab est innovatrice au niveau de la typologie de la manière de s'asseoir. Le dos de la coque préformée est disponible en finition laquée ou en placage. Le front est toujours revêtu. La chaise est disponible sur piètement luge, piètement à 5 branches sur roulettes ou en tabouret de bar. La chaise Tab est empilable et juxtaposable sans accessoires pour composer des rangées ou des îlots.
