

KRS

Bulo Designers

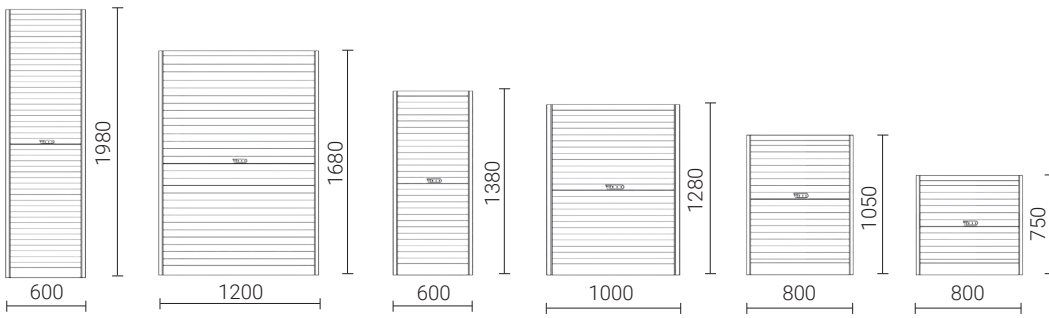

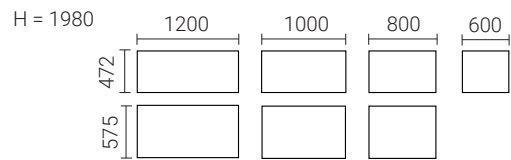

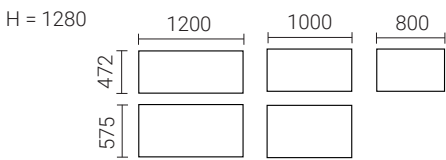

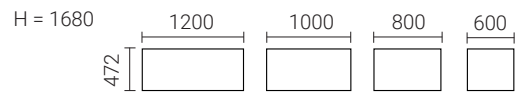

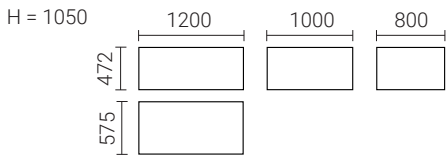

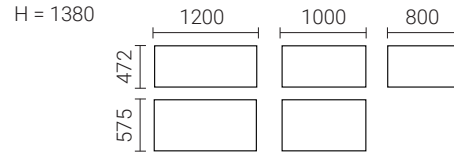

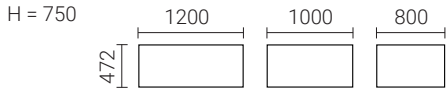

The KRS storage collection is defined by the unique tambour doors. The operation is smooth and silent and looks clean and elegant whether open or closed. It is especially functional in spaces where doors are not possible. The backs of the KRS can be upholstered allowing it to be used to define or divide spaces. Both cabinet carcass and tambour doors are available in a selection of neutral, versatile lacquer colors.

KRS is een collectie solide rolluikkasten waarin de beschikbare ruimte optimaal benut wordt en die verschillende inrichtingsmogelijkheden toelaat. Het synchroonmechanisme zorgt ervoor dat beide verticale rolluiken gelijktijdig en geruisloos kunnen worden geopend. De rugzijde van de kast kan bekleed worden met stof waardoor het gebruik als scheidingswand of ontvangstbalie mogelijk is.

KRS est une collection d'armoires solides à volet roulant dans laquelle l'espace disponible peut être utilisé de manière optimale et qui permet diverses possibilités d'aménagement. Le mécanisme synchrone veille à ce que les deux volets roulants verticaux s'ouvrent et se ferment au même temps, sans bruit. Le dos peut être revêtu de tissu ce qui permet une utilisation comme paroi de séparation ou comptoir d'accueil.
