UNDERSTAND / SHELF SYSTEM

Understand is a sculptural shelving system and room divider for many different environments.

A jewel or piece of art, as much as a storage unit, where different modules create a freestanding entity. The furniture system plays with the idea of gravitation and has no clear limits or limitations, with its levitating boxes and shapes. By placing the boxes differently, either hanging or resting on the steel frame, practical shelves and beautiful voids can be created. Even a pot for greenery can be added.

Understand stands for full flexibility and embodies the expression 'thinking outside of the box' with its ability to change, with many color, material and shape options. The piece has an architectural elegance which can be both minimal as well as playful.

DESIGN

ADDI Designstudio

MATERIALS

The metal frame is produced in powder coated steel with the choice of three colors: Black, Pale Grey or Signal White.

Modules come in Lacquered or veneer finish.

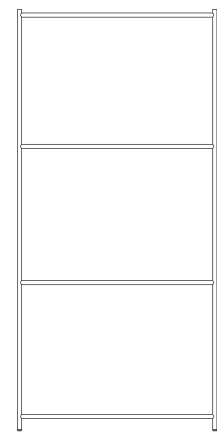

CONNECTORS

Understand always starts and ends with a gable of the High, Mid or Low model.

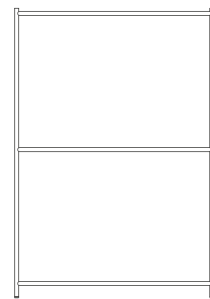

To extend the shelf system a connector is added. These connectors are offered in a variety of models and sizes to make the system complete. The connectors enable the system to be extended without double gables which gives a cleaner look. The connectors are available in six different models for the user to create their own unique set-up.
